

Version 4.0 Revision date 2021-03-24

#### Section 1. Product Identification

| Product name:  | TRITC-dextran   |
|----------------|---|
| Chemical name: | Dextran (3',6'tetramethylamino dihydroxy-3-oxospiro<br>(isobenzofuran-1(3H),9'-[9H]xanthen]-5(or 6)-yl) |
|                | carbamothioate  |
| Catalogue no.  | TD4, TD20, TD40, TD70, TD150, TD500, TD2000   |
| CAS no.        | N/A   |
| Mol. Formula:  | N/A   |
| Manufacturer:  | TdB Labs AB, Ulls väg 37, 756 51 Uppsala, SWEDEN<br>Tel: +46 (0)730608200                               |

## Section 2. Hazards Identification

| Classification of the substance | Not a hazardous substance                    |
|---------------------------------|--|
| Label elements                  | Caution- substance not yet tested completely |

### Section 3. Composition/Information on ingredients

| Chemical family:  | Carbohydrate polymer             |
|-------------------|----------------------------------|
| Appearance/odour: | Red powder, no distinctive odour |
| Melting point:    | Decomposes on heating            |
| Solubility:       | Freely soluble in water          |
| Molecular weight: | 4000-2 million Dalton            |

### Section 4. First-aid Procedures

| Inhalation: | Remove exposed person to fresh air. Get medical        |
|-------------|--|
|             | attention.   |
| Eyes:       | Wash thoroughly with water for 15 minutes. Get medical |
|             | attention.   |
| Skin:       | Wash off with soap and water.                          |
| Ingestion:  | Rinse mouth with water and give water to drink. No     |
|             | treatment required if only small amount.               |
|             | -  |

### Section 5. Fire-fighting Measures

| Extinguishing media:              | Carbon dioxide, dry chemicals or water           |
|-----------------------------------|--|
| Special fire-fighting procedures: | Use media appropriate for primary cause of fire. |

#### Section 6. Accidental Release Measures

| Collect material taking precautions to minimize dust. Use |
|---|
| wet mop.  |
| Place collected material in suitable container for        |
| disposal. Flush area with water and drain into sewer.     |
| Floor may become slippery.                                |
|   |

#### Section 7. Handling and storage

Precautions to be taken when handling: Protect from dust. Use approved facemask and protective clothes. Wear safety glasses. In case of severe and repeated exposure follow recommendations of local safety officer. Store in tight dark container.

## Section 8. Exposure Controls/Personal Protection

| Exposure limit:                        | Not established                  |
|--|----------------------------------|
| Special personal protective equipment: | Use suitable protective clothing |
| Respiratory:                           | Use approved face mask.          |
| Eyes:                                  | Use safety goggles.              |
| Gloves:                                | Use plastic gloves               |

#### Section 9. Physical and Chemical Properties

| Formula:             | N/A                           |
|----------------------|-------------------------------|
| Vapour pressure:     | N/A                           |
| Melting point:       | Decomposes                    |
| Boiling point:       | N/A                           |
| Molecular weight:    | Approx. 4000-2 million Dalton |
| Flash point:         | N/A                           |
| Solubility in water: | > 50% by weight               |

#### Section 10. Stability and Reactivity

| Stability (normal conditions):    | Stable for more than 6 years when stored dry in well- |
|-----------------------------------|---|
|                                   | sealed containers at ambient temperature.             |
| Hazardous polymerization:         | Does not occur  |
| Conditions to avoid:              | High humidity   |
| Incompatibility:                  | Avoid contact with oxidizing agent (e.g. nitric acid) |
| Hazardous decomposition products: | Thermal decomposition may yield oxides of carbon and  |
|                                   | very small amounts of oxides of nitrogen and sulfur.  |

#### Section 11. Toxicological information

| Toxicity information:          | The substance is well tolerated by experimental animals<br>and cells and no toxic effects are expected under<br>normal operating conditions. No formal toxicity reports<br>available.       |
|--------------------------------|---|
| LD50:                          | N/A   |
| Routes of entry:<br>Inhalation | Effects of occupational over exposure:<br>No information on the toxicity after inhalation.<br>Most dust will produce irritation, inflammation or toxic<br>symptoms on prolonged inhalation. |
| Eye contact                    | No information available on eye exposure.   |
| Skin contact                   | Dermal absorption not known but presumably nil.   |
| Ingestion:                     | No information of toxicity available.   |

#### Section 12. Ecological information

No information available. However, dextran itself is biodegradable.

#### Section 13. Disposal Recommendations

Collect material taking precautions to minimize dust. Use wet mop. Place collected material in suitable container for disposal. Flush area with water and drain into sewer. Large quantities may be incinerated.

### Section 14. Transport information

EEC: Dangerous goods: EINECS: Not listed Not restricted Not listed

#### Section 15. Regulatory information

P261:

Avoid breathing dust/ fume/ gas/ mist/ vapours/ spray.

#### Section 16. Other information

The above information is believed to be correct but does not purport to be all inclusive and shall be used only as a guide. The information in this document is based on the present state of our knowledge and is applicable to the product with regard to appropriate safety precautions. It does not represent any guarantee of the properties of the product. TdB Labs AB shall not be held liable for any damage resulting from handling or from contact with the above product.
